

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Nepal Nursing Council National Licensure Examination for Nurses

Sample MCQs Questions

1. The nurse calculates the IV flow rate for a postoperative client. The client is to receive 3,000 ml of Ringer's lactate solution (RL) in one over 24 hours. The IV infusion set has 10 drops per milliliter. The nurse should regulate the client's IV to deliver how many drops per minute?
 - a. 18
 - b. 21 (Key)
 - c. 35
 - d. 40
2. The nurse in a primary care clinic is caring for a 68-year-old man. History reveals that the client has smoked one pack of cigarettes per day for 45 years and drinks two beers per day. He is complaining of a non-productive cough, chest discomfort, and dyspnea. The nurse hears indistinct wheezes in the right middle lobe. It would be **MOST** important for the nurse to complete which of the following orders?
 - a. Pulmonary function tests
 - b. Echocardiogram
 - c. Chest X-ray (Key)
 - d. Sputum culture
3. An adult client with a history of gastrointestinal bleeding has a platelet count of 300,000 cells/mm³. Which action by the nurse is **MOST** appropriate after seeing the laboratory results?
 - a. Report the abnormally low count.
 - b. Report the abnormally high count.
 - c. Place the client on bleeding precautions.
 - d. Place the normal report in the client's record (Key)
4. When collecting a 24-hour urine specimen for creatinine clearance, it is **MOST** important for the nurse to do which of the following?
 - a. Obtain an order from the physician for insertion of a Foley catheter.
 - b. Obtain the client's weight prior to beginning the urine collection.
 - c. Discard the last voided specimen prior to ending the collection.
 - d. Ask if preservative is present in the container (Key)
5. A client with emphysema becomes restless and confused. What step should the nurse take next?
 - a. Encourage the client to perform paced-dip breathing (Key)
 - b. Check the client's temperature.
 - c. Assess the client's potassium level.
 - d. Increase the client's oxygen flow rate to 5 liters/min.
6. Haloperidol (Haldol) 5 mg tid is ordered for a client with schizophrenia. Two days later, the client complains of "right eye and a stiff neck." The nurse should recognize that these complaints are:
 - a. common side effects of antipsychotic medications that will diminish over time.
 - b. early symptoms of extrapyramidal reactions to the medication. (Key)
 - c. psychosomatic complaints resulting from a delusional system.
 - d. permanent side effects of Haldol.
7. The nurse cares for a client following surgery for removal of a cataract in her right eye. The client complains of severe eye pain in her right eye. The nurse knows this symptom:
 - a. is expected and should administer analgesic to the client.
 - b. is expected and should maintain the client on the bed rest.
